School launches for construction sector suppliers

The Supply Chain Sustainability School launched in Australia on 2 March 2015 with considerable media coverage. The School aims to develop the sustainability skills of the construction supply chain, focusing primarily on looking down the supply chain of Australia's main contractors. Sustainable Materials – the way forward in reducing resource intensity

As a resource-intensive industry, there are significant opportunities for the construction sector to utilise materials with low environmental and community impacts. This is particularly so for concrete and steel, which are commonly used in constructing the modern world, and accounts for a significant amount of environmental

impacts.

School membership base hits 200!

Two hundred members registered their organisations in the first two months after launch. That's a great start! Since launch, the School has had significant traction in the construction and infrastructure sectors with a range of companies already taking up the unique opportunity to access the comprehensive and free-to-access online learning with e-learning modules and other resources.
